Value of Study Abroad for SPLH

• Cultural competence: Ability to interact effectively with people of different cultural and socio-economic backgrounds.

• Consists of:
  • Awareness of one’s own cultural worldview
  • Attitude towards cultural differences
  • Knowledge of different cultural practices and world views
  • Cross-cultural skills

• Study abroad is a great vehicle for developing these skills
A Few Challenges to Keep in Mind

• SPLH training varies by country
  • Some countries don’t have SPLH
  • Other countries require different degrees for clinical practice and this changes the undergrad curriculum

• SPLH training tends to be highly desirable, potentially limiting capacity for KU students

• Certification requirements in US. KU needs to ensure that you will meet these requirements
We want you to study abroad!
We will work with you to make it happen!

But, realize that there are some challenges that limit flexibility.

EARLY and CAREFUL planning will help make study abroad work for you!
